

Social Transformations and Resilience: Stakeholder survey

Preparatory action for a new co-funded EU Partnership

Are you interested in the new European Partnership on Social Transformations and Resilience, and would you like to get involved in its development?

This survey explores how the proposal for a [co-funded Partnership](#) on 'Social Transformations and Resilience' can be grounded in the wider ecosystem of policymakers, researchers, social partners, civil society actors and other stakeholders.

The proposal for a co-funded Partnership on '**Social Transformations and Resilience**' under Cluster 2 on 'Culture, Creativity and Inclusive Society' of Horizon Europe was first presented by the European Commission in a [draft concept paper](#) in July 2023. Since then, Member States and Associated Countries have voted in favour of its inclusion in the second [Strategic Plan 2025 – 2027](#), which was adopted on 20 March 2024.

The **aim of the Partnership** is to create a transformative R&I programme between the **social sciences and humanities (SSH)** to build resilience, ensure fairness and inclusiveness, and foster social cohesion in the light of changes in climate and environment, technology, demography, and unexpected shocks. It will develop knowledge and innovative solutions to address contemporary multifaceted social challenges in a collaborative, interdisciplinary and systematic way and provide policymakers at European, national, and regional level with evidence-based recommendations and tools that can contribute to new strategies and policy solutions.

The [survey](#) has been developed, by the ZOE Institute for Future-fit-Economies and EIT Climate-KIC, to **map prospective stakeholders** and collect key reflections and perspectives on the emergent **objectives, activities and impact areas**, of the proposed Partnership. **Data from this survey will be used** to map stakeholders and analyse their relative alignment to/interest in the work of a Social Transformations and Resilience Partnership.

Your contribution will help us identify **relevant stakeholders (including end-users)** in policymaking, academia, civil society, and the social economy to ensure the necessary thematic and geographical coverage for meeting the Partnership's objectives. **If you wish to further contribute to the development of the Partnership**, you can be selected for an interview or invited to a participatory meeting, in the context of the preparatory work by the ZOE Institute and the EIT Climate KIC.
